Pressure Care - Static Support Surfaces

Integrity Sphynx™

High / Very High Risk
Static Mattress

The **Integrity Sphynx™** High / Very High Risk castellated mattress is manufactured with a foam inner, coupled with u core shaped side formers, both features of which aid comfort and patient safety. Combined with an outer, multi-stretch, vapour permeable, polyurethane coated fabric cover and tough base. A globally popular design, which although originated in a hospital setting, is now widely used in most care environments, including care at home.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Structured “U shaped” base and side formers	Enables easier patient transfer
Castellated foam surface	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning

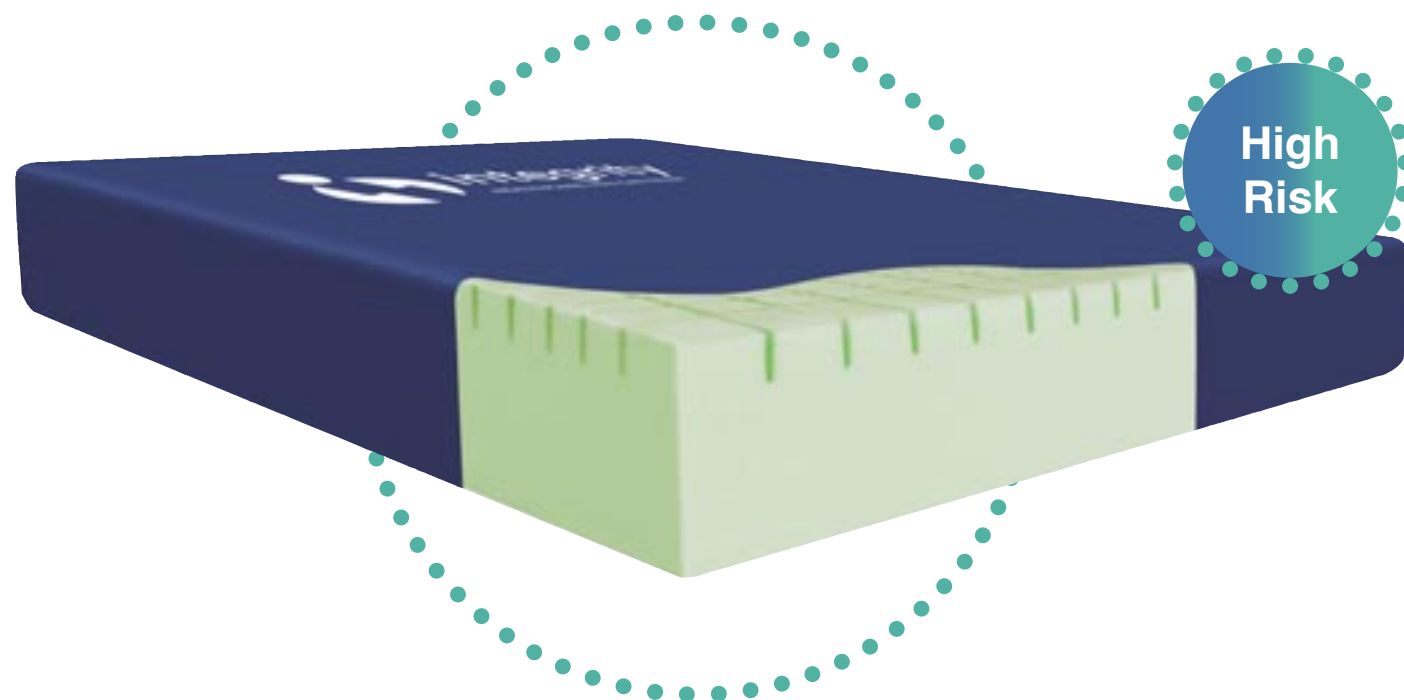

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15000
Risk Category	High / Very High Risk
Weight Limit	40 stones or 254 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	198cm L x 88cm W x 15cm D
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Very Severe

If you require any additional information, please telephone **0800 043 0050**

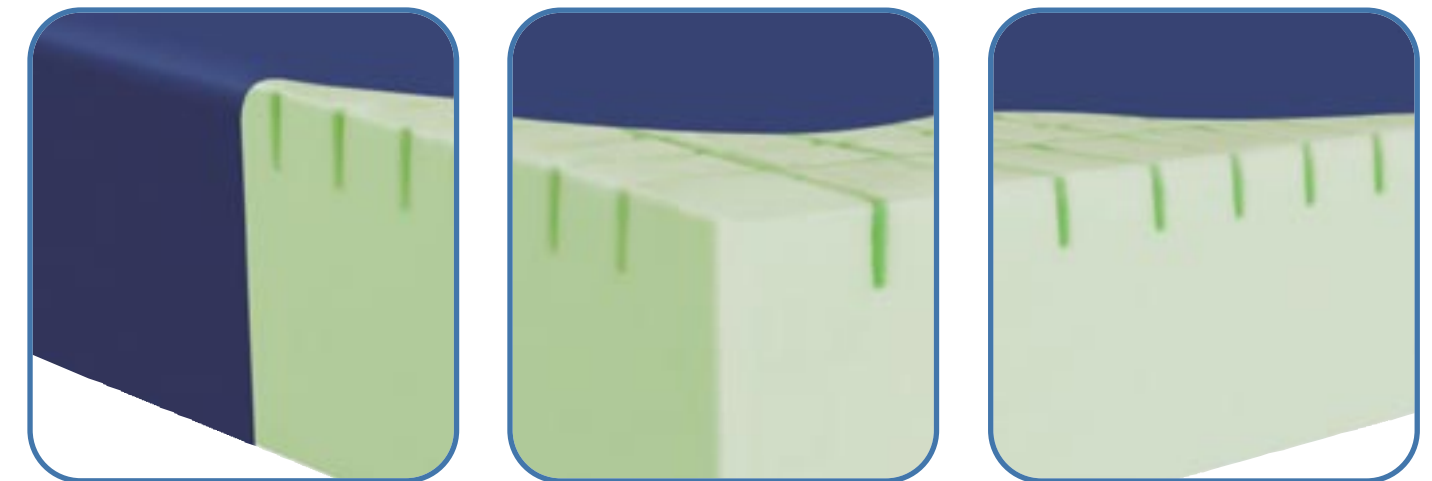

Integrity Angora™
High Risk
Static Mattress

The **Integrity Angora™** High Risk castellated mattress is manufactured from a castellated, one piece foam unit, for maximum value, whilst delivering clinical excellence. Combined with an outer, multi-stretch, vapour permeable polyurethane coated fabric cover and tough base. For those on a budget, this product is easily adapted to any healthcare environment.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Single piece foam	Achieves comfort and ease of recycling
Castellated foam surface	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION		PRODUCT CODE - 1001-15060 for the 12.5cm depth - 1001-15061 for the 15cm depth

Integrity Toyger™

Very High Risk
Visco Static Mattress

The **Integrity Toyger™** Very High Risk castellated mattress is manufactured with a visco elastic, memory foam inner, which softens when the patient immerses, creating excellent pressure redistribution. In addition to U core shaped side formers, patient safety is assured. Combined with an outer, multi-stretch, vapour permeable polyurethane coated fabric cover and tough base. Visco elastic products are used both in care home and hospital environments but are also popular at home. When comfort is of primary concern, Integrity Toyger™ is the mattress of choice.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Structured “U shaped” base and side formers	Enables easier patient transfer
Visco elastic foam surface	Redistributes peak pressures, allowing patient immersion
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15001
Risk Category	Very High Risk
Weight Limit	40 stones or 254 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	198cm L x 88cm W x 15cm D
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Very Severe

If you require any additional information, please telephone **0800 043 0050**

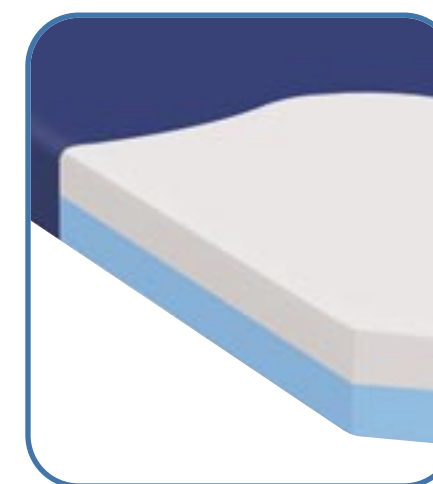

Integrity Birman™

Very High Risk
Trolley Mattress

The **Integrity Birman™** trolley mattress is manufactured to pair with most market leading trolley manufacturers. Developed from high quality glued foam pieces in order to provide excellent pressure redistribution. Combined with an outer, multi-stretch, vapour permeable polyurethane coated fabric cover and tough securing base. In high traffic area, this product ensures great longevity and in turn great value for money.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Multiple foam density construction	Achieves comfort and longevity
Surface foam	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning
Made to measure	Fits most trolley platforms

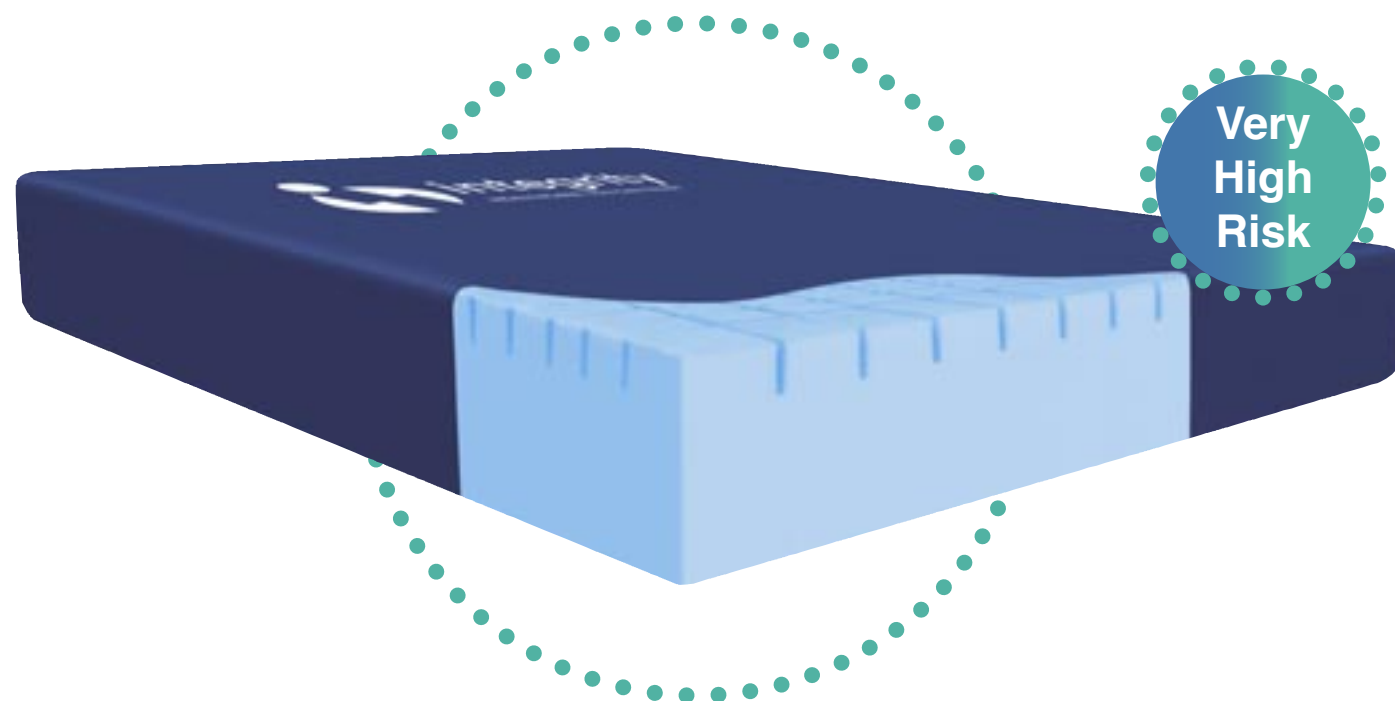

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15080
Risk Category	Very High Risk
Weight Limit	28 stones or 180 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	Made to measure
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Severe to Very Severe

If you require any additional information, please telephone **0800 043 0050**

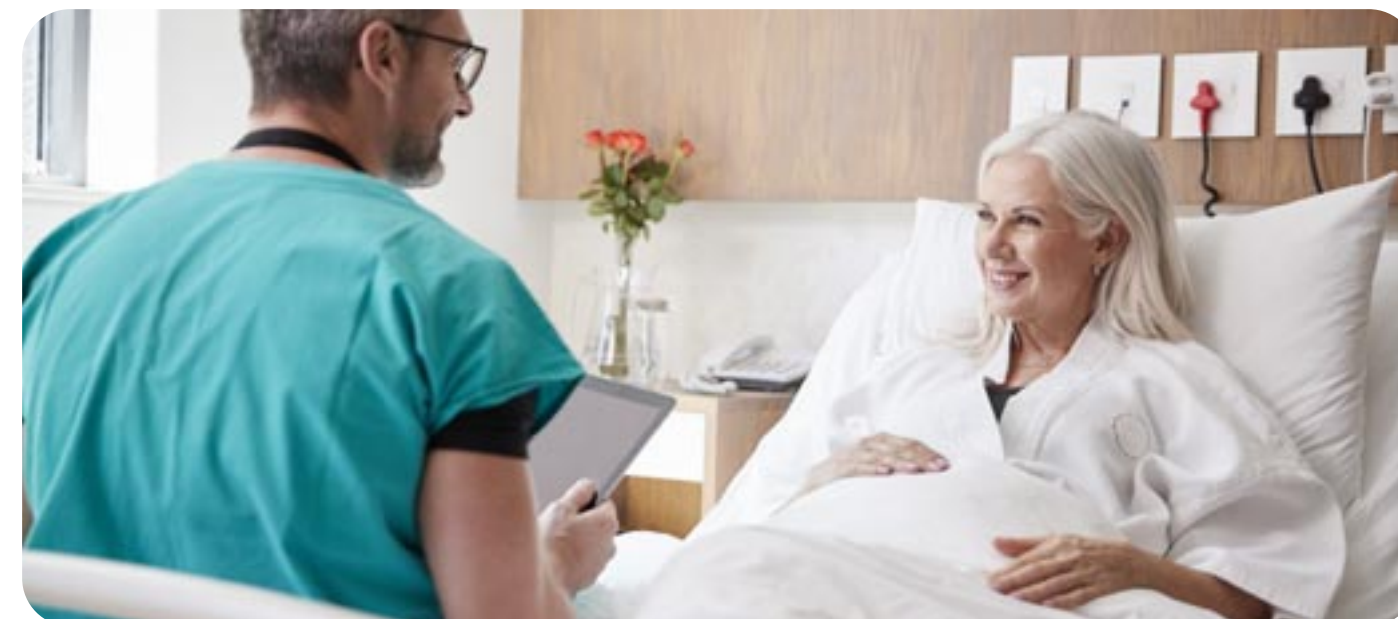

Integrity Ocicat™
Very High Risk
Mental Health Mattress

The **Integrity Ocicat™** Very High Risk castellated mattress is manufactured from a castellated, one piece foam section. The challenges faced in modern mental health units requires an extra strong but safe outer cover. Fully welded and fire safety evaluated to the highest standards, this product facilitates comfort, safety and indeed pressure care considerations at its core.

FEATURES	BENEFITS
Toughened fully welded cover	Infection Control Support
Single piece foam	Achieves comfort and ease of safety
Castellated foam surface	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
No entry seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15020
Risk Category	Very High Risk
Weight Limit	40 stones or 254 kgs
Reinforced Cove material	Prevents easy entry from challenging patient groups
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	198cm L x 88cm W x 15cm D (also available in 12.5cm depth)
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Severe to Very Severe

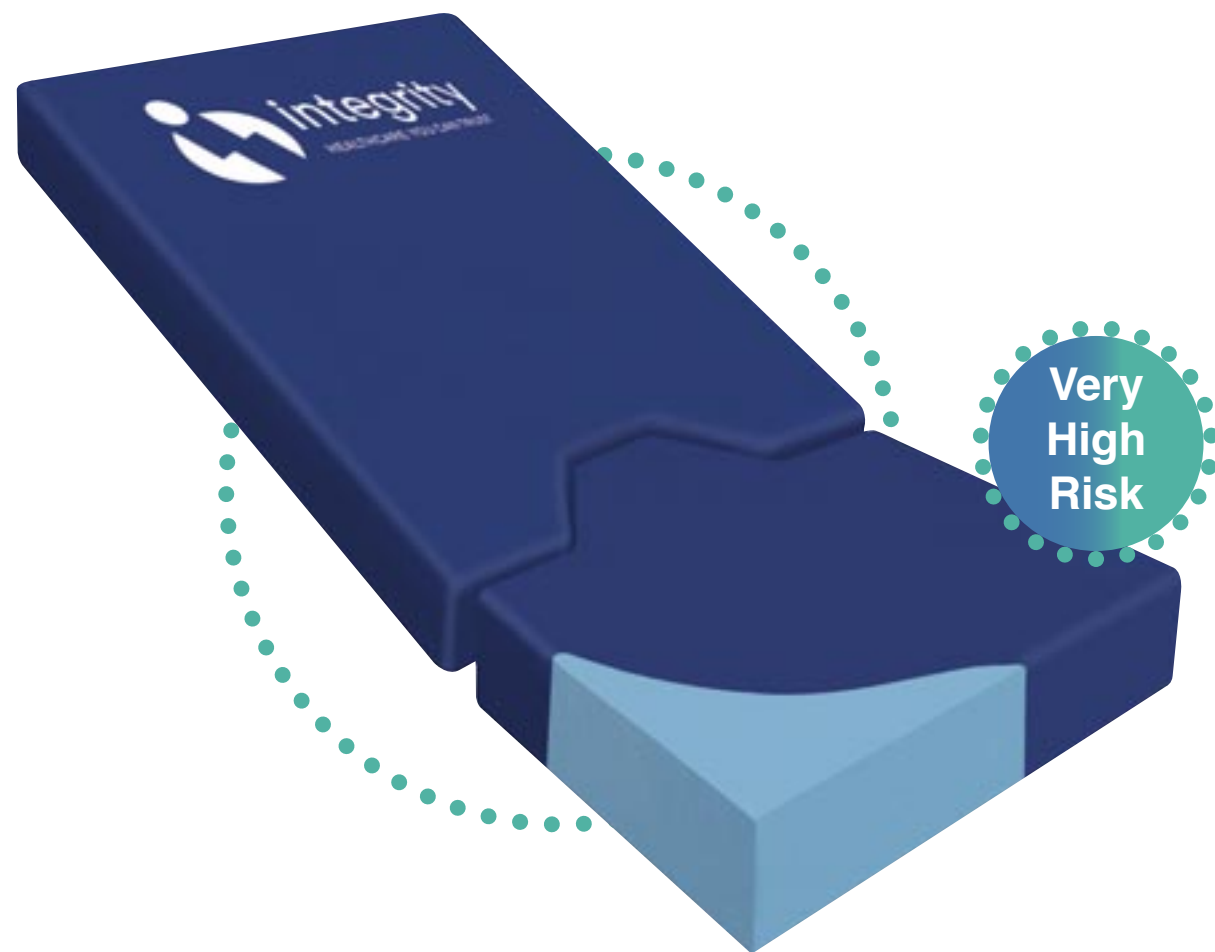

If you require any additional information, please telephone **0800 043 0050**

Integrity Burmilla™

Very High Risk
Birthing Mattress

The **Integrity Burmilla™** birthing mattress is designed for comfort and pressure redistribution during modern birthing practices. A high density foam inner, ensures stability and patient safety during childbirth. Due to the addition exposure of repeated bodily fluids, the fully welded, multi-stretch, vapour permeable, polyurethane coated fabric cover and tough base are a must on this design. Burmilla is made to fit most modern birthing platforms, achieving affordability.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
High density foam inner	Enables easier patient transfer, aids birthing procedures
Foam and multi stretch fabric combination	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15100
Risk Category	Very High Risk
Weight Limit	40 stones or 254 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	Made to measure
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Very Severe

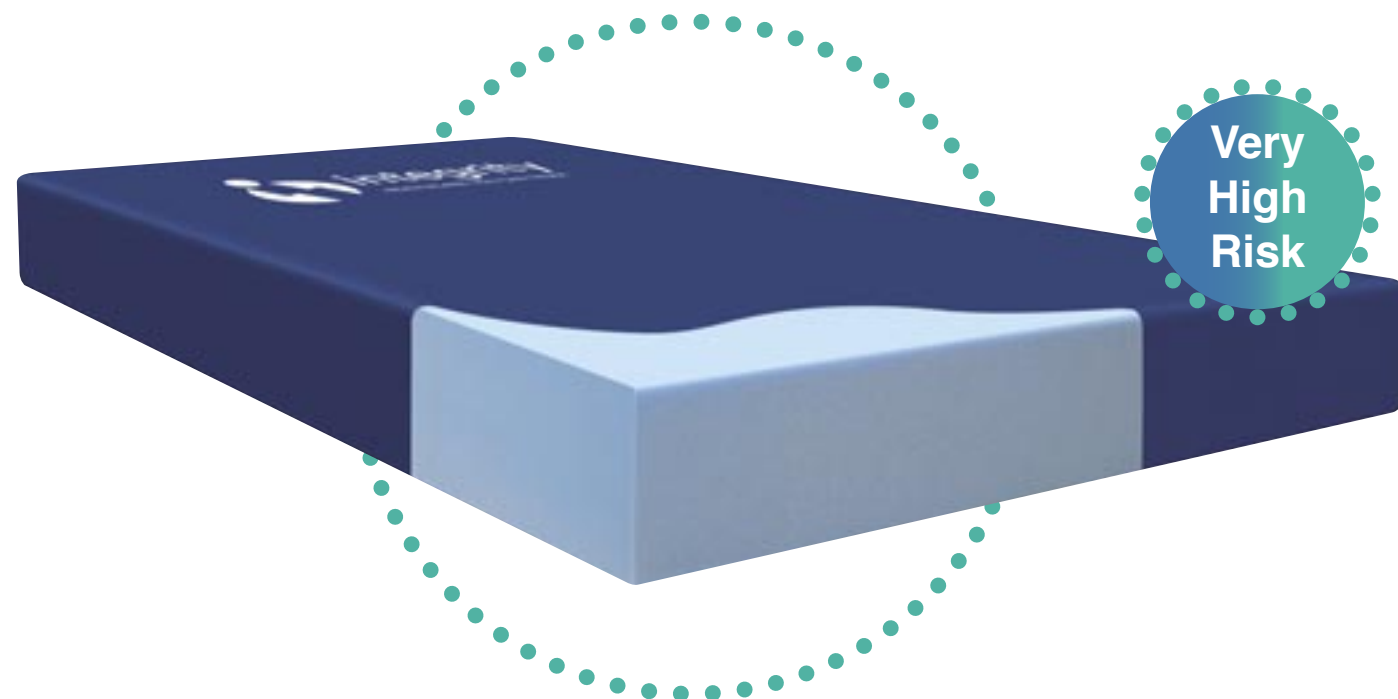

If you require any additional information, please telephone **0800 043 0050**

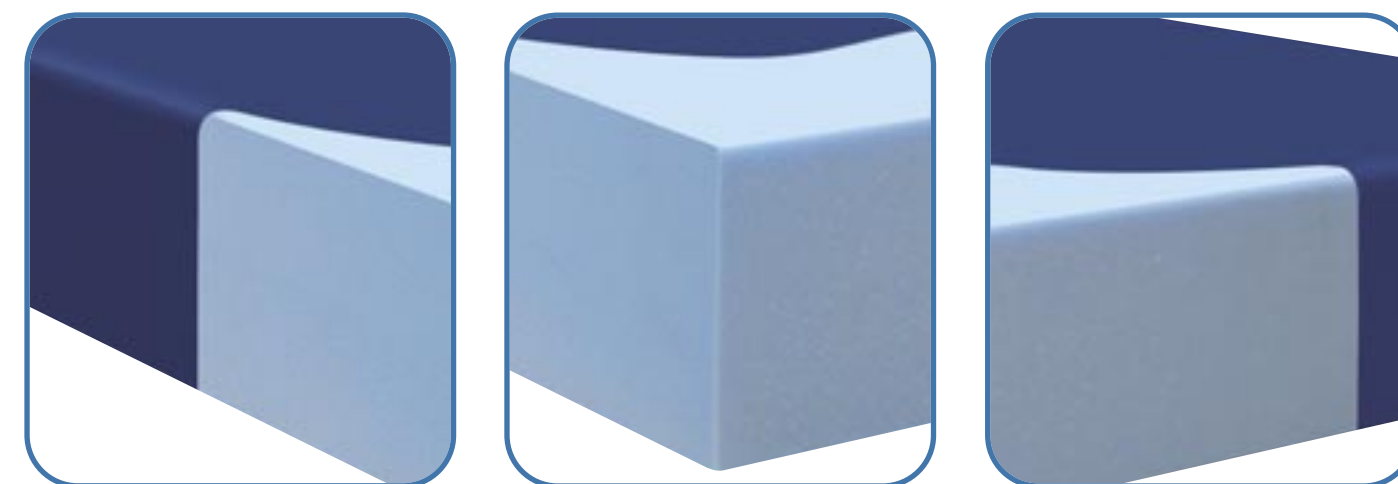

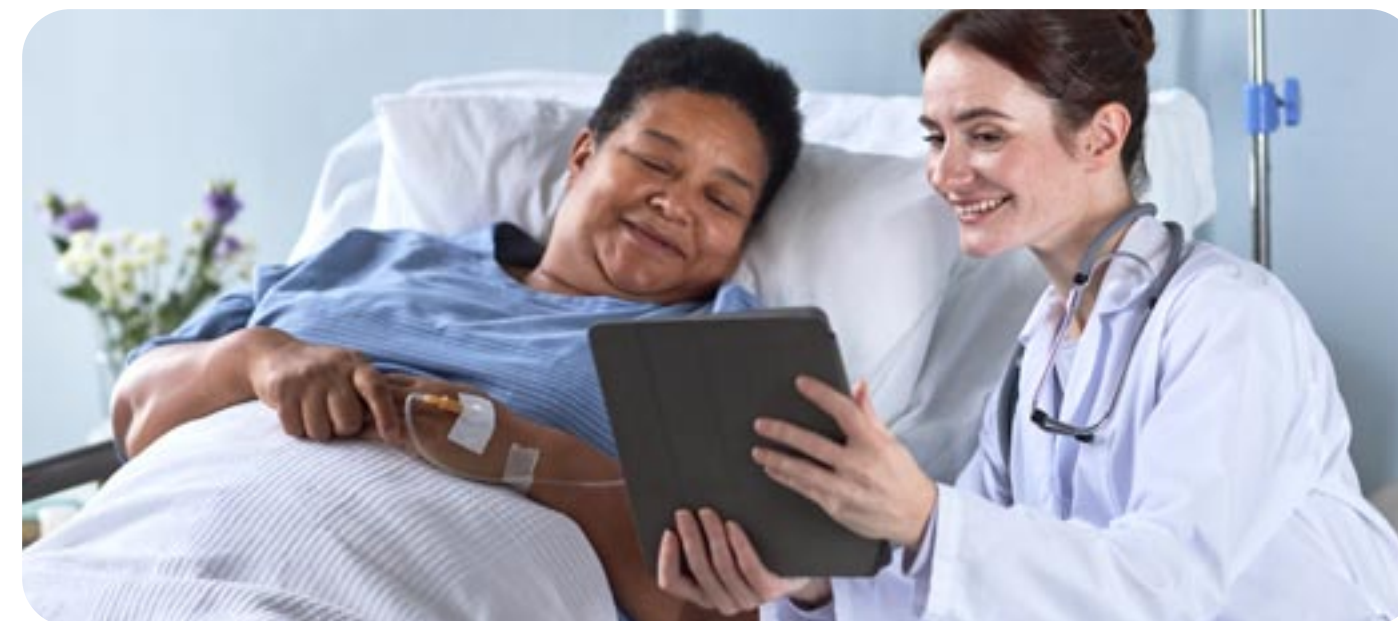

Integrity Havana™

Very High Risk
Bariatric Foam Mattress

The **Integrity Havana™** bariatric foam mattress is designed for exposure to the largest of patient groups. A high density foam inner, ensures longevity and comfort for heavy users. A fully welded, multi-stretch, vapour permeable, polyurethane coated fabric cover and tough base are contributory to the final design. Although manufactures to a standard 120cm width, accommodating most bariatric platforms, this unit can be made to measure.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
High density foam inner	Enables easier patient transfer for larger patient categories
Foam and multi stretch fabric combination	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Mattress cover with welded seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15040
Risk Category	Very High Risk
Weight Limit	50 stones or 318 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	200cm L x 120cm W x 20cm D or Made to measure (cost uplift applies)
Fire safety	BS7177 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Very Severe

If you require any additional information, please telephone **0800 043 0050**

**Integrity Havana
Cushion™**

Very High Risk
Bariatric Foam cushion

The **Integrity Havana Cushion™** bariatric foam cushion is perfectly designed for sacral exposure to the largest of patient groups. A high density foam inner, ensures longevity and comfort for heavy seated users in an area that attracts none distributed patient weight. A fully welded, multi-stretch, vapour permeable, polyurethane coated fabric cover and tough base are contributory to the final design. Although manufactures to a standard 50cm width, accommodating most bariatric seating platforms, this unit can be made to measure.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
High density foam inner	Enables easier patient transfer for larger patient categories
Tough Foam and multi stretch fabric combination	Redistributes peak pressures, allowing comfort and pressure reduction for patient
Clinical approval	Clinically trialled for patients and professionals
Cushion cover with welded seams	Prevents fluid access, ease of cleaning

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15500
Risk Category	Very High Risk
Weight Limit	50 stones or 318 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	50cm W x 50cm L x 15cm D Made to measure (cost uplift applies)
Fire safety	BS7176 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Very Severe

If you require any additional information, please telephone **0800 043 0050**

Integrity Lynx™
Very High Risk
Gel & Visco Foam Cushion

The **Integrity Lynx™** is a premium product made from an infection control friendly, moulded polyurethane gel surface. This cooling gel upper sits on top of a visco elastic foam base, which allows excellent patient immersion and as such great comfort for users. Combined with an outer, multi-stretch, vapour permeable, polyurethane coated fabric cover and none slip base. Applicable to any care environment.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Polyurethane gel surface	Cools sacral area
Contours with lower profile	Ensures patient interface in vulnerable areas. Also compatible with higher chairs & eases patient transfer
Clinical approval	Clinically trialled for patients and professionals
Welded cover with zip flap	Easy to clean, prevents aggressive fluid access
Visco base	Allowing patient immersion and comfort

TECHNICAL INFORMATION	PRODUCT CODE - 1001-15520
Risk Category	Very High Risk
Weight Limit	26 stones or 165 kgs
Cover	Wash up to 95 Degree Celsius, air or cool tumble dry Technically stretch & wear tested
Strong, None Penetrable Seams	Welded using high frequency technology
Dimensions	43cm W x 43cm L x 10cm D
Fire safety	BS7176 Crib 5 tested (composite cover and foam)
Cleaning	Appropriately diluted hypo chloride, can be used with blood / bodily fluids removal
Foam Category	Severe to Very Severe

If you require any additional information, please telephone **0800 043 0050**

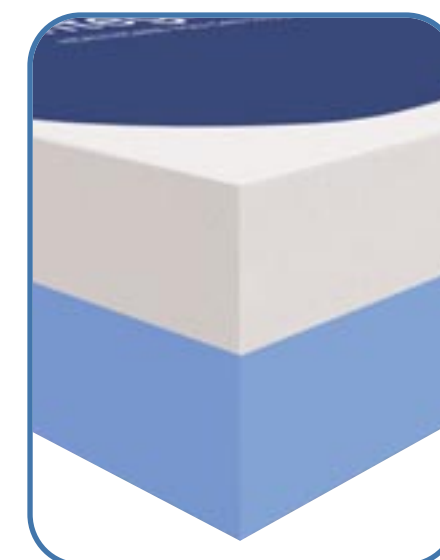

Integrity Korat™

Very High Risk
Visco Cushion

For a Very High Risk cushion requirement, **Integrity Korat™** visco cushion has all bases covered. Initially comfortable avoiding patient rejection, the visco elastic foam surface softens when immersed by the patient. The higher density foam base ensures that the patient does not experience bottoming out. Combined with an outer, multi-stretch, vapour permeable, polyurethane coated fabric cover and tough base. Applicable to either, hospital, homecare or nursing & residential settings.

FEATURES	BENEFITS
Multi-stretch, vapour permeable cover	Infection Control Support
Visco elastic surface foam	Achieves comfort and avoids rejection. Redistributes peak pressures, allowing comfort and pressure reduction for patient
High density foam base	Prevents patient bottoming out
Clinical approval	Clinically trialled for patients and professionals
Cushion cover with welded seams	Prevents fluid access, ease of cleaning
None slip base	Ensures patient safety
